Status of the Claims

Claims 1-20 have been presented for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-8, 10-11, 13, 15-19, are drawn to a method for preparing an injectable formulation of IFN- β , classified in Class 530, subclass 418.
- II. Claims 2, 9, 12, 14, 20, are drawn to a pharmaceutical composition comprising substantially monomeric IFN- β , classified in Class 424, subclass 85.6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the IFN- β protein can be prepared by materially different processes, such as obtained from nature using various isolation and purification protocols.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. The Examiner has *prima facie* shown a serious burden of search (see MPEP § 803).

Art Unit: 1651

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
